

RESEARCH & DEVELOPMENT ENGINEER
SPECIALISED IN SENSORY SCIENCES FOR SPORT GOODS
VILLENEUVE D'ASCQ, FRANCE

OUR TEAM

DECATHLON aims to conceive, design and distribute sportive products in order to make sport accessible for the many.

Decathlon SPORTSLAB is a team of more than 40 researchers and engineers studying the interaction between the human body and the product. Moreover, Sportslab contributes to the innovation and product design supporting Decathlon's own branded sports (Domyos, Kalenji, Kipsta, Quechua, etc.).

Join the SENSORY & BEHAVIORAL SCIENCES Laboratory! Our lab is in charge of the development and adaptation of sensory methods to objectively measure and understand the users' perception during sport practice.

OUR VALUES

DECATHLON's teams love sports and we share its values!

We promote initiatives and allow everyone to evolve professionally. "Collective play" is part of our DNA, we win together only if we are a united and committed team.

YOUR MISSION

You set up protocoles, perform tests, analyse and communicate results to help our own branded sports having a better understanding of users and doing the right conception choices.

You contribute to competencies upgrading of our laboratory in sensory analysis and statistics by proposing new methods/adaptations to collect and analyse our users' perception during practice.

Additionally, you support the digital transformation of our team, promoting the use of digital tools and in real time measurements.

YOUR PROFILE

You have a Master degree, preferentially in Sensory analysis, Statistics, Food science, Cognitive sciences with solid fundamentals in sensory analysis .

You have a significant professional experience in sensory analysis. You know how to use at least one statistic software, ideally R or XLStat.

You like applied research and going on the field, closer to the users. You both know how to take the time to explore new methods and run sports panels.

You are comfortable in group work and know how to interact with many interlocutors of different horizons and expertise. You are autonomous, you like to propose new ideas and help to change those of others.

In addition, you have an appeal for new technologies allowing data acquisition and analysis.

You like and share the values of sport.

Join DECATHLON and help make sport accessible for the many !
